PROFILE

Senior Frontend / Full-Stack Engineer with 16+ years of experience building scalable web applications using React, Next.js, TypeScript and Node.js.

Strong frontend focus, with solid experience delivering end-to-end features including backend logic, APIs and data management. Former Engineering Manager, combining technical leadership with hands-on delivery.

SKILLS

Frontend: React, Next.js, Vue.js, TypeScript, Tailwind

Backend: Node.js, GraphQL, PostgreSQL, REST

Tools: Git, Docker, AWS, CI/CD, Jest, Cypress

Soft Skills: Leadership, Mentoring, Collaboration, Product Thinking

EXPERIENCE

Freelance – Senior Full-Stack Engineer / Lead Developer (Nov 2025 – Mar 2026)

- Leading the design and development of a SaaS recruitment platform (ATS) from scratch
- Architecture definition (Next.js, Supabase, multi-tenant, RLS, auth flows)
- Backend & domain logic implementation (use cases, repositories, scoring engine)
- Delivered complex frontend features (**React, Next.js, TypeScript**) including unit testing with **Jest**
- Security & data isolation design (role-based access, row-level security)
- Product collaboration, MVP delivery and client demos
- Improved UX and performance

Independent Projects & Technical Exploration (Feb 2025 – Present)

- Developed Vaultune, an audio sample management tool (React, TypeScript, Python, C++)
- Explored audio processing and DSP using JUCE (C++)
- Strengthened fullstack skills (React, TypeScript, backend integration)

Le Collectionist – Engineering Manager (Hands on)(Oct 2022 – Jan 2025)

- Led a team of 4 **frontend** developers to deliver high-quality features on the booking platform.
- Migrated legacy Vue stack to **Nuxt 3 + TypeScript**, improving Lighthouse performance by +25%.
- Collaborated with backend teams (Ruby on Rails) to streamline APIs and reduce bugs by -40%.
- Introduced CI/CD pipeline (**Vercel + GitHub Actions**), boosting delivery cadence by +30%.
- Improved frontend performance and user experience on key booking flows
- Stack: Nuxt 3, **Vue 3, TypeScript**, Rails API, **Vercel, GitHub Actions**.

Reezocar – Fullstack Developer (Jun 2021 – Oct 2022)

- Redesigned the website using **Next.js, React**, and **GraphQL**.
- Improved Core Web Vitals, SEO, and user engagement (+18% organic traffic).
- Built backend features in Node.js + PostgreSQL for search and filtering.
- Stack: **Next.js, React, Node.js, GraphQL, PostgreSQL, Knex**.

Abbeal – Fullstack Developer (Mar 2018 – Jun 2021)

- Delivered scalable web apps in **React, Node.js**, and **GraphQL**.
- Built reusable UI components and API integrations.
- Implemented automated testing (**Jest, Cypress**).
- Stack: **React, Node.js, GraphQL, Sequelize, Jest, Cypress**.

Earlier Roles (2009 – 2018)

- **Frontend developer & tech lead** in-house at **Business Lab and Fullsix/Ekino**, consulting at **UX-Republic**. Delivered responsive frontends, mentored juniors, and improved UX workflows.
- Clients: **Air Caraïbes, Peugeot, OUIGO, Fnac, Renault, HOP(Air France)**.
- Stack: **React, Backbone, jQuery, Sass, Gulp, HTML/CSS**.

EDUCATION & CERTIFICATIONS

Licence MIPC – Université de Nantes (2 years)

Bac Pro Procédés Industriels – Lycée Mireille Grenet

C++ Training – Dyma (2024)

Languages: French (Native), English : Professional working proficiency

SIDE PROJECTS

Vaultune (2025) – Audio sample management app (**React, Python, C++**).

Exploring JUCE & DSP to bridge software development and music production.
